

2 FIRST SEASON OVERVIEW

FIRST[®]

ENERGIZESM

PRESENTED BY **Qualcomm**

This is the moment to get energized to innovate. From the machines that move us to the food that sustains us to the wireless technologies that connect us, energy plays an essential role in keeping our world running. During our 2022-2023 robotics season, **FIRST® ENERGIZESM** presented by Qualcomm, our teams will reimagine the future of sustainable energy and power their ideas forward. Innovation can't wait.

This year, **FIRST** teams will address today's global challenges related to [United Nations Sustainable Development Goal #7](#), focused on ensuring access to affordable, reliable, sustainable, and modern energy for all. By encouraging **FIRST** participants to think about future energy sustainability, we're also empowering them to be the next generation of leaders and innovators, tackling the world's toughest challenges.
